The Hospital Cares About Your Safety!

Learn about what we are doing to protect you from the infections while you are here.

1. **INITIAL SCREENING:** Instructing, actively identifying and guiding patients with symptoms like cough, fever and shortness of breath to a general hospital, even before they reach the registration counters.

![Thermometer Image](image1)

2. **SOCIAL DISTANCING:** Spacious, well ventilated waiting room facilities to avoid crowding.

![Social Distancing Image](image2)

3. **SANITIZATION:** Frequent, effective sanitization of patient waiting areas, devices and equipments.

![Sanitization Image](image3)
4. **MASK:** Mandatory use of face masks/face covers anywhere inside the hospital, by staff and patients alike

5. **CROWD LIMITATION:** Limiting the number of people in any closed room at a time to the minimum

6. **HAND SANITIZATION/HAND WASHING:** Adequate provision for hand-washing and hand-sanitizer supply
7. **EXAMINATION BOOTH CHECK UP:** Increased number for examination booths for quick patient check-ups

8. **GEDIATRIC & PEDIATRIC PRIORITY:** Priority/Expedited care for children and elderly patients

We are striving to add upon/update these steps, in line with the evolving international/national patient safety norms.
